

Panel discussion

Sharing views on CO₂ storage developments in Europe

Focus of 6th CO₂GeoNet Open Forum is CO₂ storage developments Europe-wide

Current European pilot & demo projects

Main outcomes of 2011 CO₂GeoNet/CGS Europe Open Forum

- Good overview of: demos, pilots, natural / experimental field sites, latest research results

- Several issues raised, e.g:
 - Terminology: storage complex, leakage ...
 - Different uses of the subsurface: priorities, conflicts of use?
 - Knowledge-sharing, information, communication
 - Create trusty environments for taking on board all views and finding solutions together
 - What if a leakage occur (b-out groups practical exercise)
 - Public acceptance at local level
 - Urgency, make faster progress
 - Costs
 - Regulations

Objectives of this panel discussion

- Sharing views on current state-of-play in Europe
 - How far are we advanced?
 - What still need to be done?
 - What role for the scientific community?

Keep regulatory aspects for tomorrow!

Panelists

- Vassilios Kougionas, DG Research
- Martina Doppelhammer, DG Climate Action
- Lionel Perrette, Directorate General Energy and Climate, French Ministry of Ecology
- Andrés Pérez-Estaun, CIUDEN, Spain
- Ameena Camps, IEAGHG
- Derek Taylor, Global CCS Institute
